

Introduction to Global Bridging

August 2017 | V1.2

Introduction to Global Bridging

We are an independent and privately funded short term bridging lender; dedicated to bringing you the best customer experience.

With Global, you will get a range of first and second charge lending products, secured on either residential or commercial property.

We are committed to bringing unrivaled services to all our clients.

We can offer a decision in principle within 1 hour of initial enquiry as well as same day valuation instructions and completion within 7 business days.

HOW WE WORK

Its easy as...

1
We lend and manage our own funds which enables us to make speedy decisions as opposed to many other lenders who have to put all of their cases to external investors.

2
When we enquire about your circumstances you speak directly to a decision maker hence our process is a lot quicker than many other lenders. We can often offer 100% funding with additional security.

3
As a result of this we understand the complexities of structuring deals to meet the right solution to meet our client's needs. We are creative thinkers and are always looking to make deals happen.

Introduction to Global Bridging
